Body Bag / Cadaver Bag

Specially designed for protecting the corpse handlers against EBOLA

How to avoid any leaking of the body fluid?

1. material needs to be waterproof
2. seams need to be sewed with binding + hot sealed
3. zipper tape needs to be covered with binding
4. if sewed with hanger, the needle holes inside the bag need to be covered with waterproof patch

Other Advantages:

1. non toxic, environmental friendly material
2. can hold weight over 120kgs
3. straight or curved U shape zipper
4. with hanger or not
5. with 1 leaflet +3 ID tags
6. suitable for use in hospitals, accidents or disasters.

Seams sewed with binding + hot sealed

zipper tape covered with binding

needle holes inside the hanger covered with waterproof patch

Remarks: We can help you design your own branded packaging
